

**Overview**

The IRX II RACK mount option is designed to mount the IRX II in a rack system using 1U of rack space. This optional rack mount device is designed to hold one or two IRX II units while only using the same 1U vertical space. The rack mount has been constructed of high quality steel, which has been painted with a special black powder-coat paint that compliments the IRX II's own finish.

**Specifications**

| DESCRIPTION     | SPECIFICATION                                |
|-----------------|--|

| Weight          | 2 lbs / 907g                                 |
| Finish          | Black - powder coated                        |

**Installation**

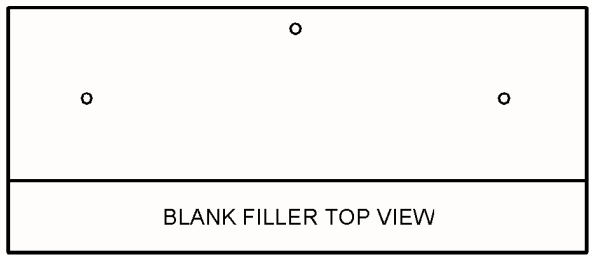

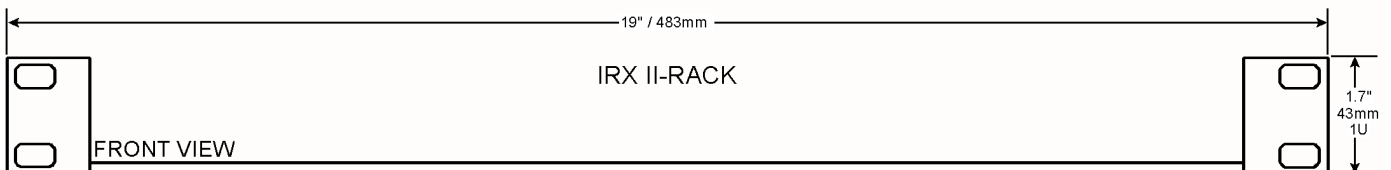

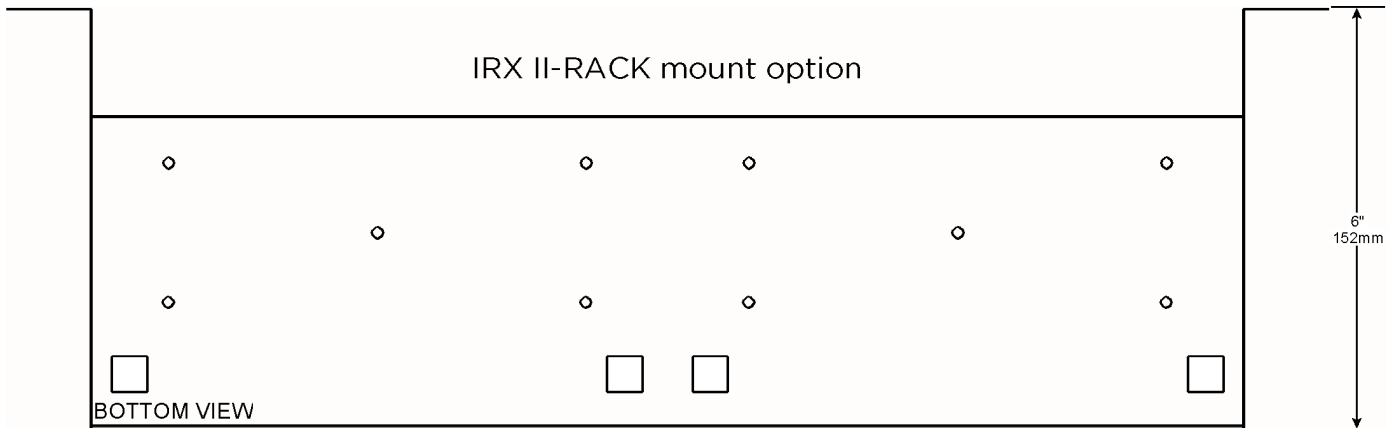

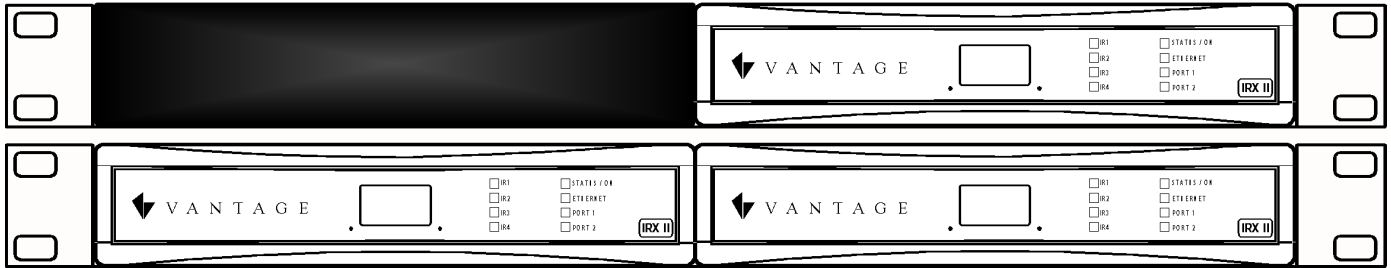

Installation of Vantage products should be performed or supervised by a *Certified Vantage Installer*.

- Line up the IRX II's bottom side with the five screw holes in the rack mount option.
- It is not necessary to remove the IRX II FEET
- Secure the IRX II with five flat-head screws (provided)
- Secure the IRX II RACK mount device in the rack using standard rack mount hardware
- *Illustration One*, shows the finished view with one or two IRX II installations
- The blank IRX II Filler is replaced with the second IRX II unit when installing two IRX II receivers.
